Who we are...

The Community Ventures family of companies have been created based on a strong commitment to partnering and working with the public sector in support of delivering community based services to local communities, with a strong blend of private and public sector management experience and our strong public sector ethos and values through its Board and senior management team.

We invest in the Health and Social Care of local communities

We pride ourselves on our people and service centred solutions and our focus on delivering value for money to our clients. In an open and honest environment, innovation and quality is at the forefront of all our decisions, products and services.

Our aims and values are to provide an exquisite service and produce well planned and energy efficient products that are both functional and unique in style and delivery.

Our aim

To provide high quality services and facilities for our partners to support and enhance the Health and Social Care of local communities, becoming the market leader in the North of England.

Our values

- To respect and work in partnership with all stakeholders
- To establish open and honest dialogue with those who we work with
- To provide people centred solutions within the range of services and products we provide
- To provide added value and value for money
- To take into consideration our impact on protecting the environment

Our team

The community ventures team is made up of experienced staff from Senior-level NHS and Commercial sectors – a team that wholly understand NHS governance and operations.

A team that delivers you...An end to end service to meet your individual needs – it's up to you where you want the journey to start.
